Consumers at the Heart of the Energy System – a DNO perspective

Purpose

- About UK Power Networks- Our Vision
- The changing energy system
- The services we provide are changing
- What the future means for our customers

About UK Power Networks

Measure	Data	% of industry
End customers	8.2m	28%
Population served	20m	28%
New metered connections	46,000	32%
Distributed generation connected	9GW	32%
ED1 totex allowance	£6,029m	25%
Energy distributed	85TWh	29%
Peak demand	16GW	28%

Deliveringur vision

Our vision is informed by our employees, consumers and wider stakeholders

A RESPECTED CORPORATE CITIZEN

The safest The best employer

The most reliable
The best service
The most innovative
The most Sociably responsible

The lowest cost

...and consistently best performing DNO 2015 - 2018/9

The Energy System is changing

Old world

Centralised- few large Generators

Predominantly fossil fuel based

One way power flows

Predictable - Planned

Customers consume only

Flexibility from large generators

New world

Decentralised (Thousands of distributed generators)

Hybrid – Vast volumes of renewables Bi-directional power and information flows

ancononal power and information no

Intermittent - Actively Managed

Customers self-produce, consume and trade Flexibility from Demand, Storage and generation

The Energy System in 2030

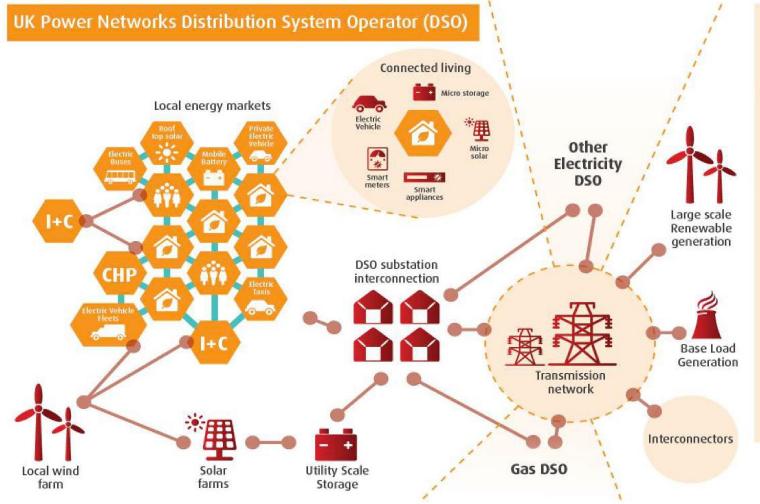

The UKPN world in 2030

~13 GW of solar

~4 GW of storage

~1.8-3.5m Electric Vehicles

CHP Combined Heat and Power

I+C

Industrial and Commercial

DSO Distribution System Operator

Connected Living

Enabled by:

- Smart meters
- Distributed Generation
- Storage
- Micro Grids
- Community Energy and peerto-peer
- **Electric Vehicles**
- Smart appliances
- Market and regulatory reform
- Demand flexibility

Distribution networks acting as a facilitator for a wide range of energy resources and market models

Change is already here

Growth in DG

- 9.07GW of DG connected, doubled in the last 5 years
- First Solar / Storage schemes with no subsidy support
- Over 200,000 distribution connected generators

Storage Market

- Over 1.2GW of accepted storage offers
- 1574 (27.7GW) formal enquiries since July 2015
- 177MW of connected storage

Growth in Electric Vehicles

- Over 300 electric buses in London by 2020
- 169,000 Plug-in vehicles sold in the UK, 31% on our networks
- UKPN actual EV connected load
 55% ahead of forecast
- Over 5,000 public charge points connected to our network

Pace and scale of change continues to increase

The services we provide are changing

Accelerate the roll out of Active Network Management

Educate

and inform

customer groups

different

Continue to run flexibility tenders for Distributed Energy Resource (DER)

network visibility and monitoring

Support local energy growth

Consider potential new areas of vulnerability

Clarify the DSO's roles and responsibilities

Strengthen the collaboration between different energy sectors

Visit: FutureSmart.ukpowernetworks.co.uk

Improve

Distribution System Operator priorities in response

1 Facilitate cheaper and quicker connections using proven innovation

Use customer flexibility as an alternative to network upgrades

3 Develop enhanced System Operator capabilities

4 Collaborate with Industry to enable whole system benefits

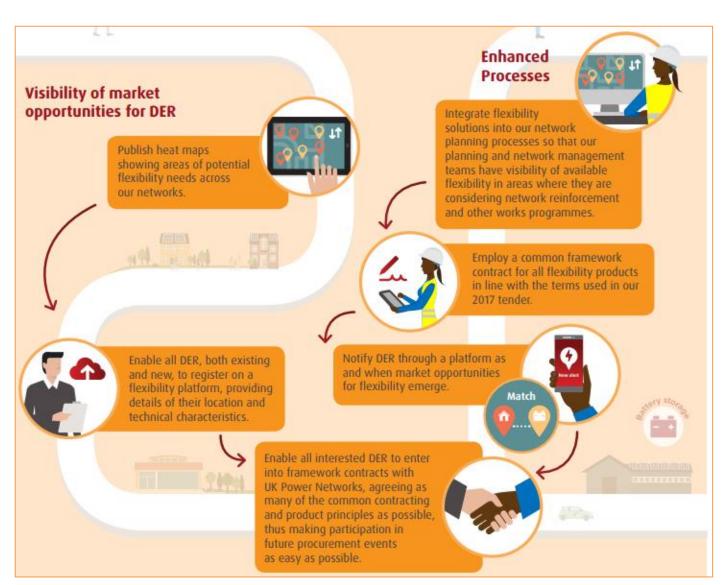

Prepare and facilitate the uptake of Electric Vehicles

Flexibility Roadmap

What's in it?

What our current distribution network needs are.

Why flexibility from DER can help us efficiently manage these system needs.

What our proposed flexibility products and contracting principles are.

How these DSO system needs might evolve in the future.

How we will work with DER to facilitate efficient contracting and maximum participation of all DER types.

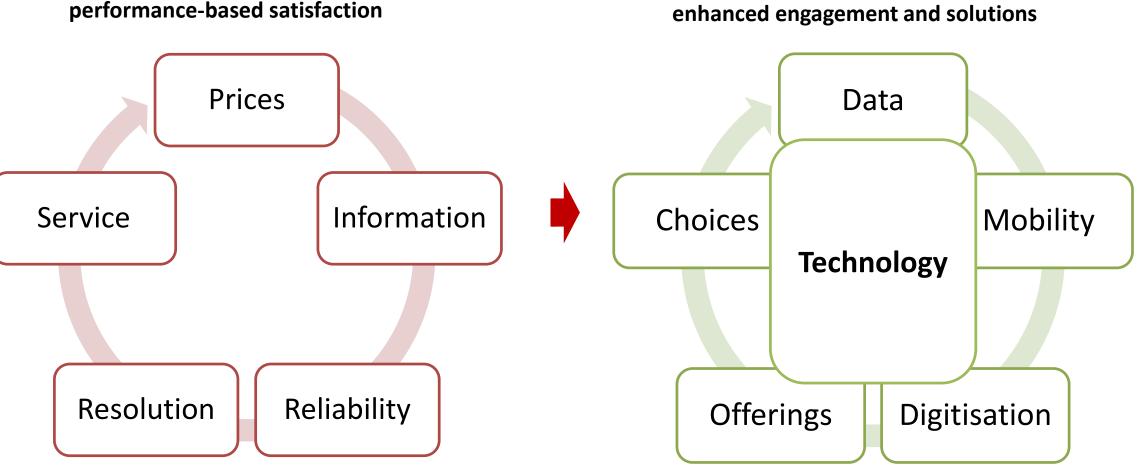

How we will engage with DER over the coming years in a fair and transparent manner.

Customers and the Energy Market

Customers and the Energy Market

The future customer....

Will be digital, Smartphone connected and social

Will demand greater choice

Will be empowered with data to self manage energy use

Will require a higher overall experience

Will demand and adopt new infrastructure technologies

The future Network....

- Social Media, Always contactable
- Constant refreshing products and offerings
- Green options as standard
- Self service as a minimum standard
- Provide access to information and data at customer fingertips
- Social Energy- gifting and Peer to Peer facilitation
- Local community energy solutions
- Electric Vehicle facilitation
- Electrified heating solutions
- Lifestyle choices, green credentials
- Simple to interact and understand offerings
- Balance demand and generation at a domestic level

Conclusion

- The world of energy is changing fast, and we recognise that our role has to evolve
- Our transition to Distribution System Operator (DSO) has already started to enable a smart and flexible system
- Listening to our customers and stakeholders will continue to be a priority
- We are committed to learning through doing to shape this exciting future
