Energy for a Net Zero Society – Comments on Energy Policy

Catalina Guillen-Rozo

The need to shape the regulatory framework

Four key issues affecting the delivery of a decarbonised energy system

1

Resistance to change / no environmental targets

3

The lag in decision making

2

Lack of accountability

4

Least-worst regret / no strategic planning

Resistance to change / no environmental targets

The lag in decision making

Lack of accountability

Least-worst regret and no strategic planning

Thank you.
