What is the value of CCS?

Piera Patrizio, Yoga Pratama, Niall Mac Dowell

Imperial College London

Data: NOAA, <u>https://www.esrl.noaa.gov/gmd/ccgg/trends/index.html</u>

The Right Hon. Claire Perry MP

"We need CCUS, [but] it remains a pre-commercial technology. [In the UK], we want to have the option to deploy CCUS at scale during the 2030s, subject to costs coming down "

- 1. Does CCS *have* any value?
- 2. How helpful are cost targets?
- 3. Should we believe in unicorns?
- 4. Other kinds of value?

1. Does CCS *have* any value?

2. How helpful are cost targets?

3. Should we believe in unicorns?

CCGT-CCS technologies provide the greatest value

Value of CCS is context specific

Value ≠ cost

1. Does CCS have any value?

2. How helpful are cost targets?

3. Should we believe in unicorns?

How helpful are cost targets?

- We know that CCS
 - Is integral to least cost decarbonisation targets
 - Provides value to the electricity system
 - Is vital to decarbonising industry
- Yet we persistently
 - Hear that the "cost must come down"
 - Wait on new technologies
 - Set isolated cost targets

1. Does CCS *have* any value?

2. How helpful are cost targets?

3. Should we believe in unicorns?

Should we believe in unicorns?

- We typically assume perfect foresight
- This is not the world we live in...
- Can we trust in technological optimism?
- What is the least regrets strategy?

Perfect foresight capacity expansion

Imperfect foresight capacity expansion

- O- myopic-wait Carbon Intensity

If the "super tech" fails to materialise, we have an **overbuilt and underutilised** power system.

Myopia in planning affects operation and cost

What does matter?

The power system is	
changing	

"+" \rightarrow "+++" = low \rightarrow high value

*modelled as minimum stable generation point, up-/down time

Technology Feature	Value in future power systems
High Efficiency	+
High Flexibility*	++
Low CAPEX	+++
Dispatchability	+++
Firm capacity/ancillary service provision	+++
Low OPEX	+
High Rate of Deployment	++

M Schnellmann, CF Heuberger, SA Scott, JS Dennis, N Mac Dowell , 2018, Int J GHG Con, Accepted

1. Does CCS have any value?

2. How helpful are cost targets?

3. Should we believe in unicorns?

Can we measure social value?

- We need more than just a discussion around technologies...
- Wider social impacts are becoming popular (COP24, UN SDGs)
- How do we account for social equity in evolving energy systems?
- It's an intertwined word...

- 1. Does CCS *have* any value? YES!
- 2. How helpful are cost targets? Unhelpful, and simplistic...
- 3. Should we believe in unicorns? No!
- 4. Other kinds of value? Jobs; across all levels of the economy...
